Sam & Joe,

Just wanted to let you know Ray did a great job for us here today. He jumped right in when he got here this morning even though he had to wake up early to get here.

I basically went over the problem I was having with the filler. I think he will agree our environment is our problem. Our older design controllers have been exposed to our environment since we received the filler. As soon as the new controllers were installed everything was great.

Once again, thanks for the great service and take care of Ray as he is an asset to your operation.

Sincerely,

A handwritten signature in black ink, appearing to read "Greg Watkins", written in a cursive style.
